

Software Development 2.6

Anna Legaspi

I can check that my web pages meet needs using IT tools and marking corrections as necessary. Pages should be free from most obvious errors and checked for validity. <http://validator.w3.org/>. They should sample peers and or the target audience for feedback.

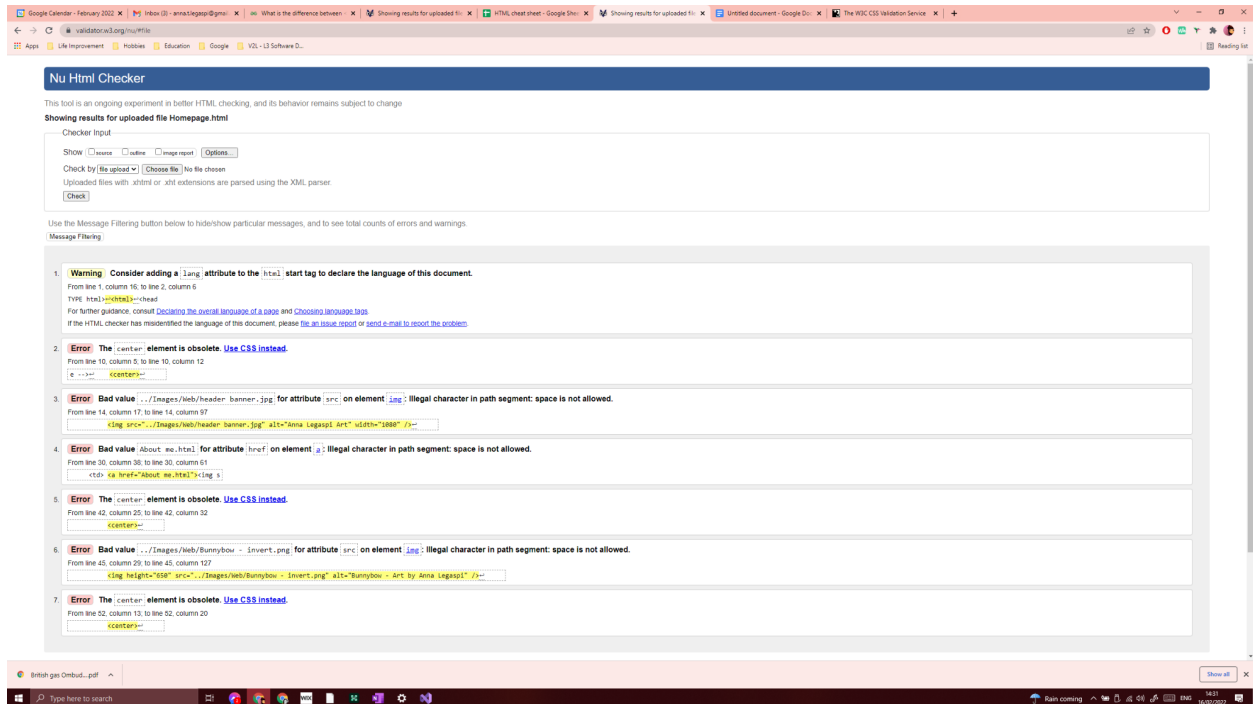

CSS main page

I've just ran a CSS check under https://jigsaw.w3.org/css-validator/#validate_by_upload and found no errors.

Home page

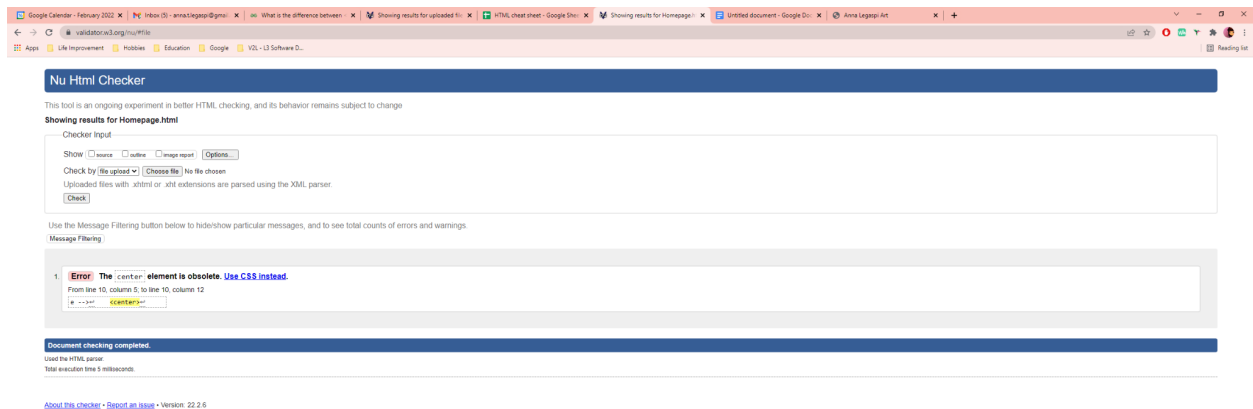

Initial check of my Homepage.html came up with the following errors.

Following this, I've made the following amendments:

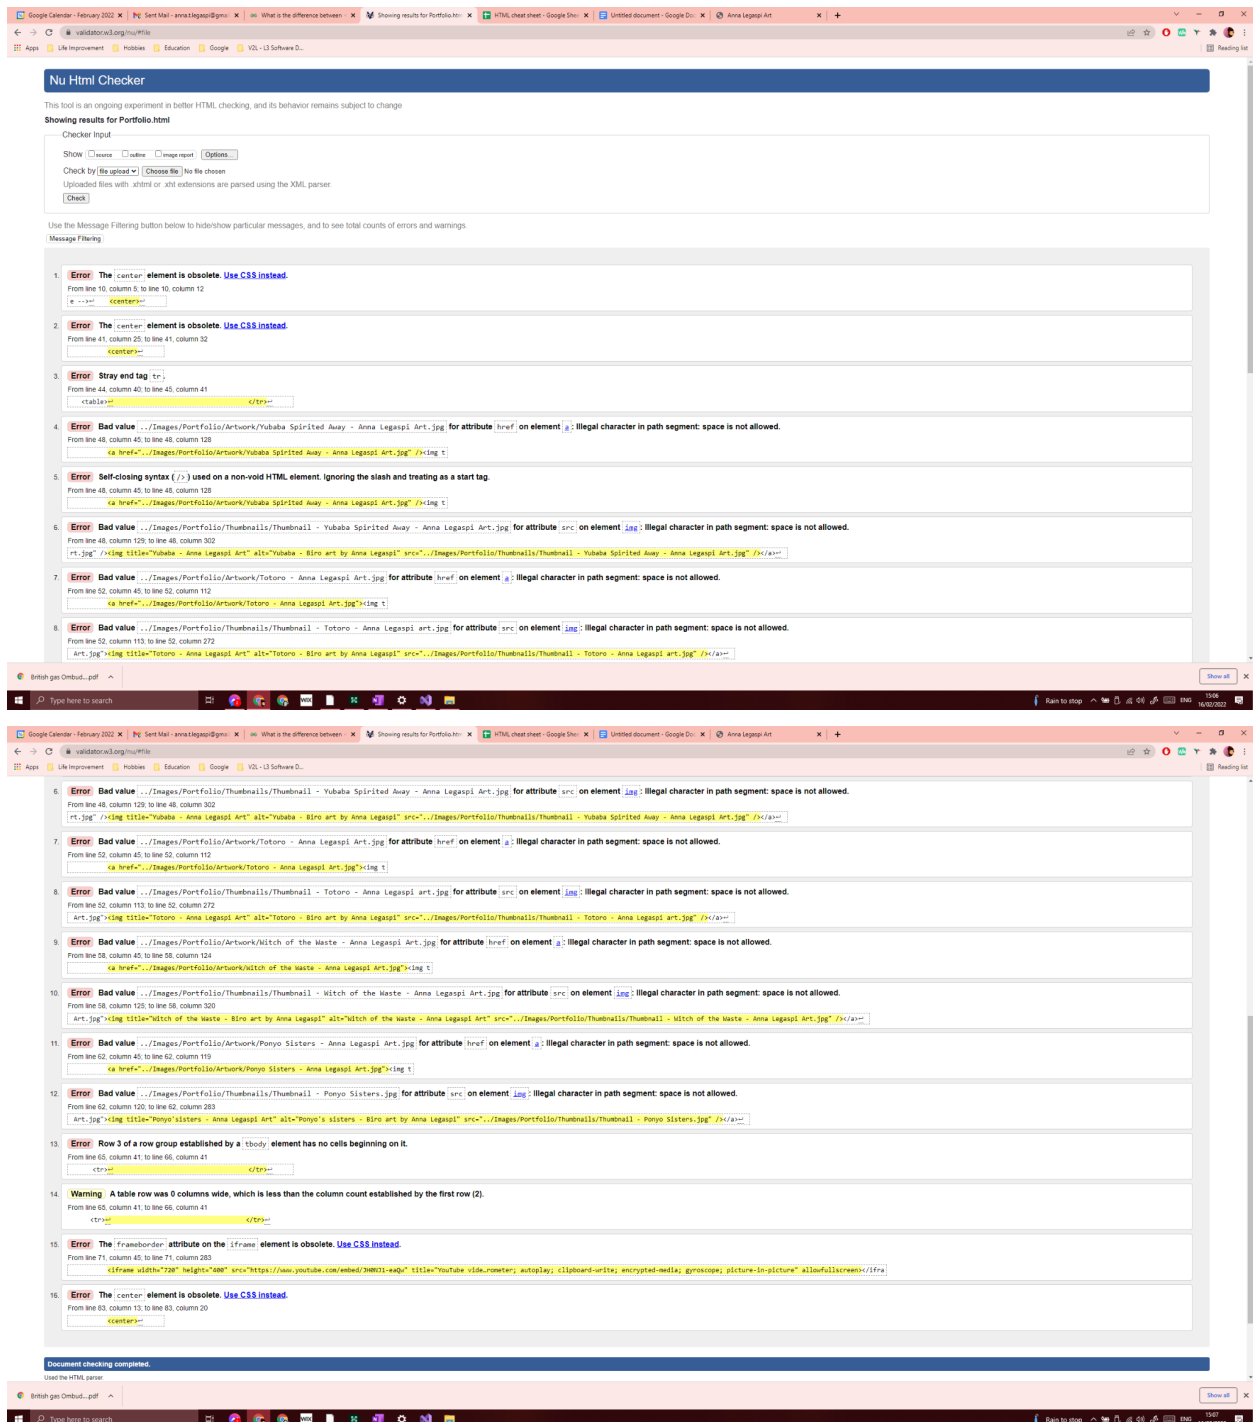

- 1) Added the lang attribute.
- 2) Changed <center> to css
- 3) Changed my file names so they don't have spaces

I've run another validation check and the only error left was the <center> tag. Although the <center> tag is obsolete, it still works absolutely fine and my website still displays as intended.

Portfolio

Initial check of my Portfolio.html page came up with the following:

Following this, I've made the following amendments:

- 1) Changed <center> to css
- 2) Changed my file names so they don't have spaces

- 3) Checked table row from line 65
- 4) Stray end tag tr. Line 44-45
- 5) Self-closing syntax (/>) used on a non-void HTML element. Ignoring the slash and treating as a start tag. Line 47

I've run another validation check and the only error left was the <center> tag. Although the <center> tag is obsolete, it still works absolutely fine and my website still displays as intended. The <iFrame> tag was also flagged, but this code was directly taken from YouTube.

Nu Html Checker

This tool is an ongoing experiment in better HTML checking, and its behavior remains subject to change.

Showing results for Portfolio.html

Checker Input

Show ☐ source ☐ outline ☐ image report [Options...](#)

Check by [file upload](#) [Choose file](#) No file chosen

Uploaded files with .xhtml or .xht extensions are parsed using the XML parser.

[Check](#)

Use the Message Filtering button below to hide/show particular messages, and to see total counts of errors and warnings.

Message Filtering

- Error:** The `<center>` element is obsolete. [Use CSS instead.](#)
From line 10, column 5, to line 10, column 12
`<a --><center>--`
- Error:** The `<center>` element is obsolete. [Use CSS instead.](#)
From line 65, column 37, to line 65, column 44
`<center>--</center>`
- Error:** The `<frameborder>` attribute on the `<iframe>` element is obsolete. [Use CSS instead.](#)
From line 69, column 45, to line 69, column 283
`<iframe width="720" height="400" src="https://www.youtube.com/embed/3Hh31-eaQ8" title="YouTube video player, autoplay, clipboard-write, encrypted-media, gyroscope, picture-in-picture" allowfullscreen></iframe>`

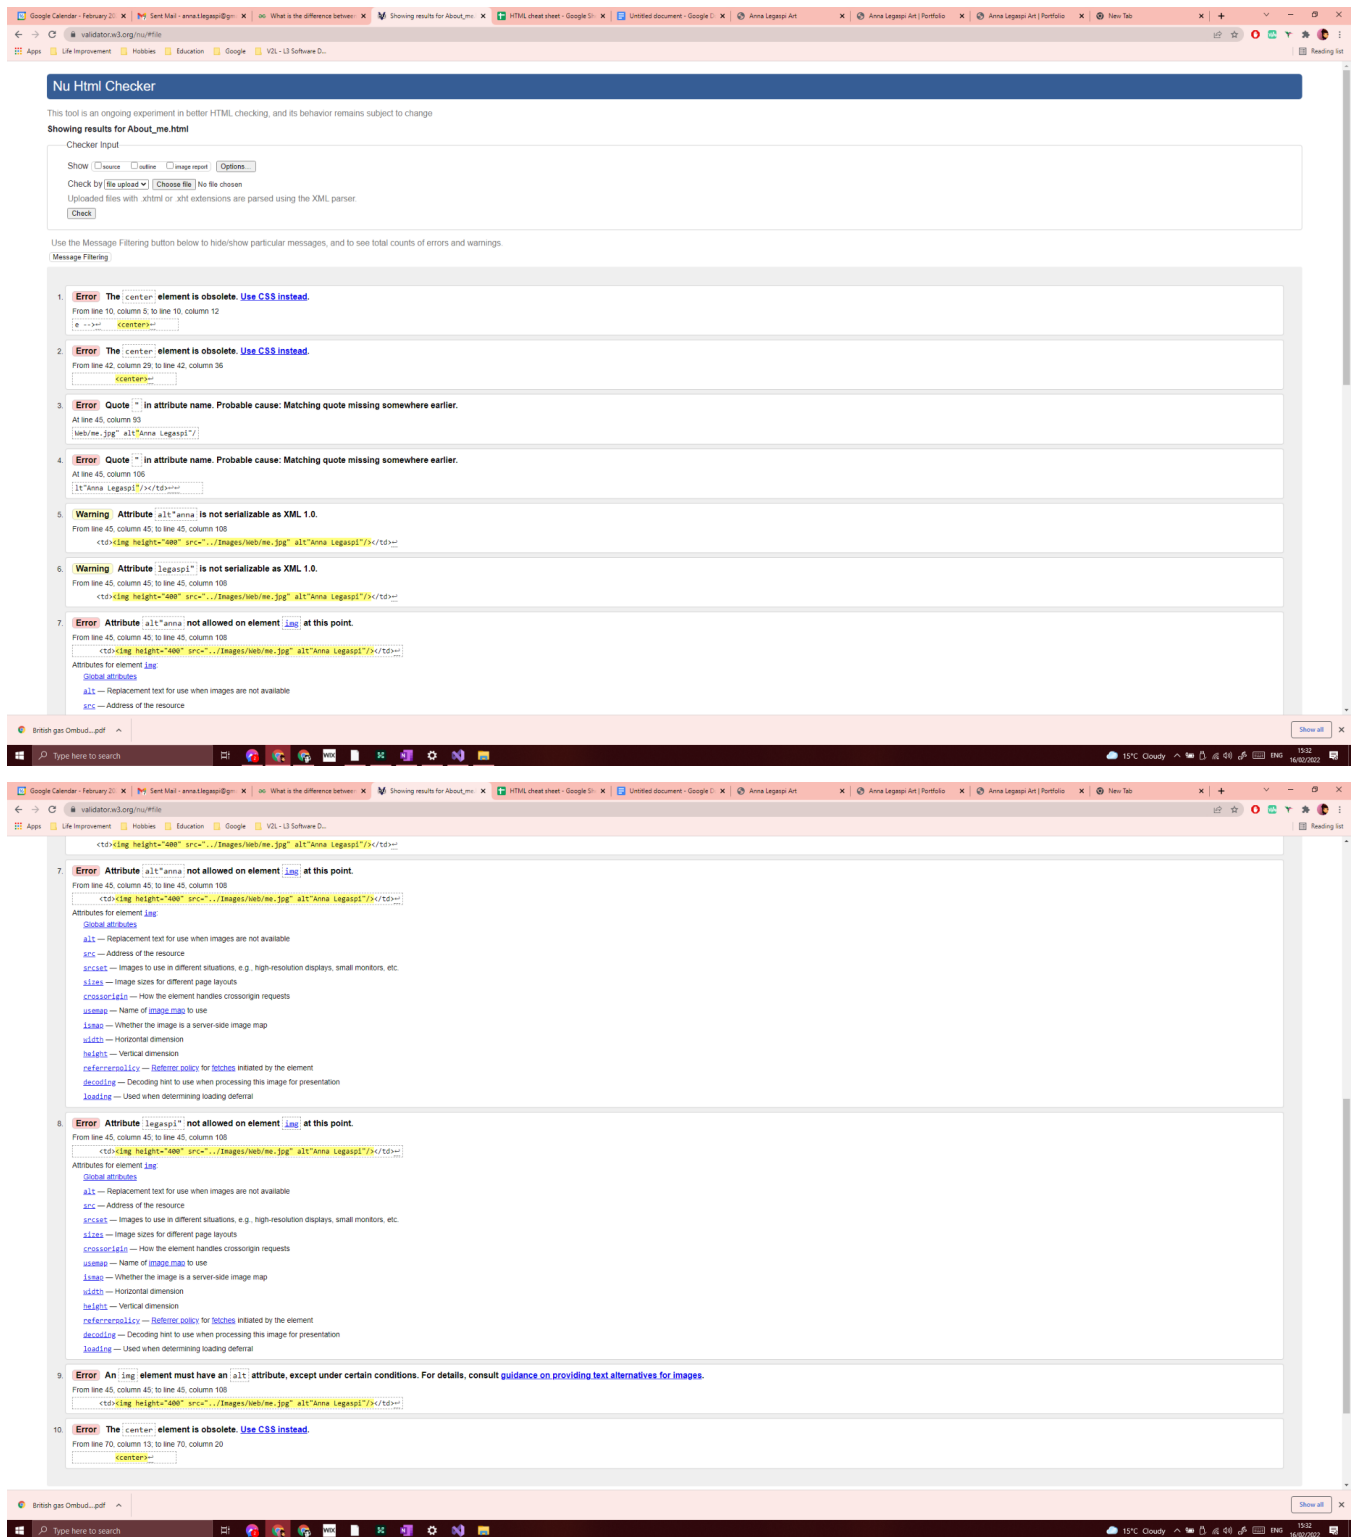

Document checking completed.

Used the HTML parser.
Total execution time 8 milliseconds

About me

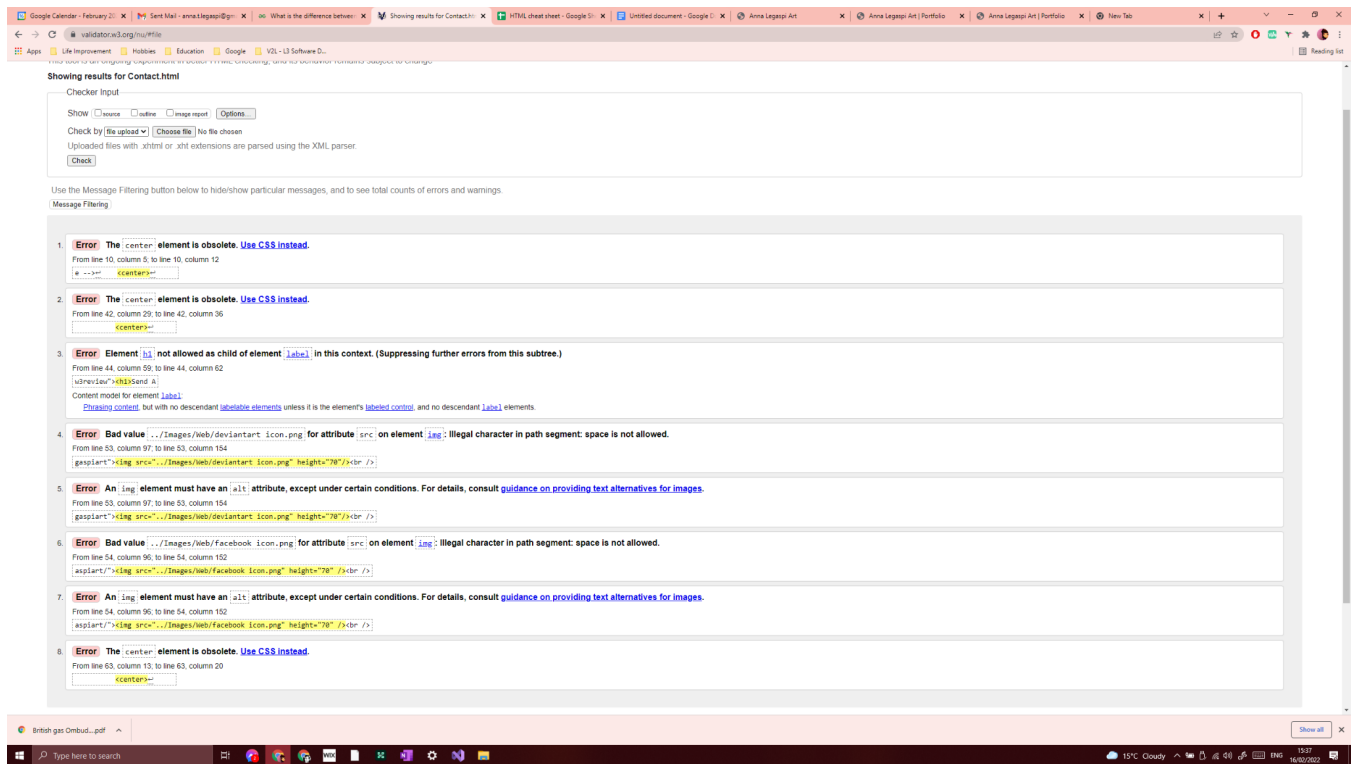

Initial check of my About_me.html page came up with the following:

Although it appears to have many errors, this was only because I forgot to put “=” after the “alt” attribute.

Contact

Initial check of my Contact.html page came up with the following:

Following this, I've made the following amendments:

- 1) Changed the removed the <h1> heading in line 44. Removed the text completely from the form and added a separate header above it.
- 2) Removed spaces in file names
